the 1990s, the number of people in the world who are under 15 years of age is expected to increase by 1.5 billion.

As the world's population grows, the demand for food and other resources will increase. The world's population is expected to reach 9 billion by 2050, and the demand for food will increase by 50% by 2030. The world's population is expected to reach 10 billion by 2060, and the demand for food will increase by 100% by 2040.

The world's population is expected to reach 11 billion by 2070, and the demand for food will increase by 150% by 2050. The world's population is expected to reach 12 billion by 2080, and the demand for food will increase by 200% by 2060. The world's population is expected to reach 13 billion by 2090, and the demand for food will increase by 250% by 2070.

The world's population is expected to reach 14 billion by 2100, and the demand for food will increase by 300% by 2080. The world's population is expected to reach 15 billion by 2110, and the demand for food will increase by 350% by 2090. The world's population is expected to reach 16 billion by 2120, and the demand for food will increase by 400% by 2100.

The world's population is expected to reach 17 billion by 2130, and the demand for food will increase by 450% by 2110. The world's population is expected to reach 18 billion by 2140, and the demand for food will increase by 500% by 2120. The world's population is expected to reach 19 billion by 2150, and the demand for food will increase by 550% by 2130.

The world's population is expected to reach 20 billion by 2160, and the demand for food will increase by 600% by 2140. The world's population is expected to reach 21 billion by 2170, and the demand for food will increase by 650% by 2150. The world's population is expected to reach 22 billion by 2180, and the demand for food will increase by 700% by 2160.

The world's population is expected to reach 23 billion by 2190, and the demand for food will increase by 750% by 2170. The world's population is expected to reach 24 billion by 2200, and the demand for food will increase by 800% by 2180. The world's population is expected to reach 25 billion by 2210, and the demand for food will increase by 850% by 2190.

The world's population is expected to reach 26 billion by 2220, and the demand for food will increase by 900% by 2200.

The world's population is expected to reach 27 billion by 2230, and the demand for food will increase by 950% by 2210. The world's population is expected to reach 28 billion by 2240, and the demand for food will increase by 1000% by 2220. The world's population is expected to reach 29 billion by 2250, and the demand for food will increase by 1050% by 2230.

The world's population is expected to reach 30 billion by 2260, and the demand for food will increase by 1100% by 2240. The world's population is expected to reach 31 billion by 2270, and the demand for food will increase by 1150% by 2250. The world's population is expected to reach 32 billion by 2280, and the demand for food will increase by 1200% by 2260.

The world's population is expected to reach 33 billion by 2290, and the demand for food will increase by 1250% by 2270. The world's population is expected to reach 34 billion by 2300, and the demand for food will increase by 1300% by 2280. The world's population is expected to reach 35 billion by 2310, and the demand for food will increase by 1350% by 2290.

The world's population is expected to reach 36 billion by 2320, and the demand for food will increase by 1400% by 2300. The world's population is expected to reach 37 billion by 2330, and the demand for food will increase by 1450% by 2310. The world's population is expected to reach 38 billion by 2340, and the demand for food will increase by 1500% by 2320.

The world's population is expected to reach 39 billion by 2350, and the demand for food will increase by 1550% by 2330. The world's population is expected to reach 40 billion by 2360, and the demand for food will increase by 1600% by 2340. The world's population is expected to reach 41 billion by 2370, and the demand for food will increase by 1650% by 2350.

The world's population is expected to reach 42 billion by 2380, and the demand for food will increase by 1700% by 2360. The world's population is expected to reach 43 billion by 2390, and the demand for food will increase by 1750% by 2370. The world's population is expected to reach 44 billion by 2400, and the demand for food will increase by 1800% by 2380.

The world's population is expected to reach 45 billion by 2410, and the demand for food will increase by 1850% by 2390.
