Goodbye R2

Bucklet

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 2001). The number of people who are malnourished has increased from 1.1 billion in 1990 to 1.5 billion in 2000 (FAO 2001). The number of people who are obese has increased from 100 million in 1975 to 300 million in 2000 (WHO 2000).

There is a growing awareness of the need to address the problem of malnutrition and obesity. The World Health Organization (WHO) has launched a global strategy to reduce the burden of malnutrition and obesity. The strategy is based on the following principles: (1) to reduce the burden of malnutrition and obesity; (2) to improve the health and well-being of the world's population; (3) to promote sustainable development; and (4) to ensure that the benefits of the strategy are shared by all people (WHO 2000).

The WHO strategy is based on the following principles: (1) to reduce the burden of malnutrition and obesity; (2) to improve the health and well-being of the world's population; (3) to promote sustainable development; and (4) to ensure that the benefits of the strategy are shared by all people (WHO 2000). The strategy is based on the following principles: (1) to reduce the burden of malnutrition and obesity; (2) to improve the health and well-being of the world's population; (3) to promote sustainable development; and (4) to ensure that the benefits of the strategy are shared by all people (WHO 2000).
